PROFESSIONAL SUMMARY

Operations and data management professional with 9+ years of cross-industry experience in data administration, validation, reporting support, workflow improvement, document control, and systems-based operations. Experienced in managing high-volume records, correcting legacy data, organizing fragmented information, and developing practical digital workflows.

Demonstrated ability to improve data accessibility, reduce repetitive manual work, and support multiple users through structured documentation, centralized databases, reusable templates, and operational troubleshooting.

CORE COMPETENCIES

Data Operations | Data Entry & Validation | Data Cleansing | Records Management | Reporting Support | Workflow Improvement | Process Standardization | Document Control | Database Administration | Operations Support | User Support | Systems Troubleshooting

PROFESSIONAL EXPERIENCE

SMP PGRI 13 Bogor — Bogor, Indonesia

Data Operations & School Systems Specialist
January 2021 – June 2026

- Managed end-to-end data operations for approximately 120–130 active student records through Dapodik, including data entry, correction, validation, synchronization, maintenance, and reporting.
- Reviewed, cleaned, and corrected legacy records to improve data accuracy, completeness, consistency, and reliability.
- Performed routine data validation and reconciliation to identify missing information, duplicate records, and inconsistencies before reporting and synchronization.
- Organized fragmented administrative data and documents into structured digital folders with standardized file-naming conventions and document classifications.
- Developed a lightweight internal academic database using HTML and Firebase to centralize information and support multi-user access through desktop and mobile devices.
- Created reusable Microsoft Excel and Word templates for recurring data collection, reporting, academic documentation, certificates, and administrative processes.
- Reduced several manual operational workflows from multi-day completion to same-day processing or completion within hours.

- Reduced completion time for several recurring documents to approximately 30–120 minutes, depending on complexity, through structured templates and improved workflows.
- Supported 12 teachers and 1 administrative staff member by improving access to data, documents, templates, and internal systems.
- Maintained financial administration data through ARKAS, including budget input, bookkeeping records, realization tracking, General Cash Book administration, period closing, and reporting support.
- Supported computer-based examinations by preparing devices, checking network readiness, validating system access, and resolving technical issues during examination activities.
- Provided operational troubleshooting for Wi-Fi, networks, laboratory computers, hardware, software, CCTV, servers, and Interactive Flat Panel devices.
- Coordinated with school leadership, teachers, staff, parents, education authorities, other operators, and external vendors to resolve data, system, and operational issues.
- Prepared workflow documentation, folder structures, and system references that remained usable by other staff members and the next operator after the role transition.

EARLY CAREER EXPERIENCE

Cross-Industry Operations Roles

2016 – 2021

- Gained operational experience in retail, customer service, ticketing, logistics administration, back-office support, digital marketing, merchandising, and a small food and beverage business.
- Developed practical skills in data handling, document preparation, reporting, customer service, operational coordination, inventory-related processes, and SOP compliance.
