PROFESSIONAL SUMMARY

Education administration and school operations professional with 9+ years of cross-industry experience, including more than five years supporting academic administration, student data, school financial administration, digital examinations, IT infrastructure, and daily school operations.

Experienced in managing Dapodik and ARKAS processes, maintaining accurate student records, supporting teachers and administrative staff, organizing digital documentation, and improving recurring administrative workflows. Able to combine administrative accuracy, user support, communication, and practical systems troubleshooting in a school environment.

CORE COMPETENCIES

School Administration | Academic Operations | Student Data Management | Dapodik Administration | ARKAS Administration | Document Control | Financial Administration | Digital Examination Support | Education IT Support | Reporting | Stakeholder Coordination | Workflow Improvement

PROFESSIONAL EXPERIENCE

SMP PGRI 13 Bogor — Bogor, Indonesia

Education Administration & School Operations Specialist
January 2021 – June 2026

- Managed end-to-end student data administration for approximately 120–130 active records through Dapodik, including data entry, correction, validation, synchronization, maintenance, and reporting.
- Reviewed and corrected legacy student records to improve data completeness, accuracy, consistency, and readiness for administrative and reporting requirements.
- Managed the full ARKAS financial administration cycle, including budget input, bookkeeping, General Cash Book administration, realization tracking, period closing, and reporting support.
- Organized administrative and academic documents through structured digital folders, standardized file names, document classifications, and reusable templates.
- Created Microsoft Word and Excel templates for recurring letters, reports, certificates, student records, and other administrative requirements.
- Developed a lightweight internal academic database using HTML and Firebase to centralize information and enable multi-user access through desktop and mobile devices.

- Supported 12 teachers and 1 administrative staff member with student data access, administrative documents, system guidance, reporting requirements, and daily operational needs.
- Supported computer-based examinations as a proctor and technical operator by preparing devices, checking networks and system access, and resolving issues during examination sessions.
- Provided technical support for school Wi-Fi, networks, laboratory computers, hardware, software, CCTV, servers, and Interactive Flat Panel devices.
- Coordinated with school leadership, teachers, administrative staff, parents, education authorities, other school operators, and external vendors to resolve data, administrative, and technical issues.
- Reduced several manual administrative processes from multi-day completion to same-day processing or completion within hours.
- Reduced the completion time of several recurring documents to approximately 30–120 minutes, depending on complexity, through standardized templates and improved workflows.
- Prepared folder structures, templates, system references, and workflow documentation that remained usable by other staff members and the next operator after the role transition.
- Taught Physical Education, Sports and Health and coached the school basketball extracurricular program alongside administrative and operational responsibilities.

EARLY CAREER EXPERIENCE

Cross-Industry Operations Roles

2016 – 2021

- Gained experience in retail, customer service, ticketing, logistics administration, back-office support, digital marketing, merchandising, and a small food and beverage business.
- Developed practical skills in communication, customer service, documentation, data handling, reporting, coordination, daily operations, and SOP compliance.
